

# Fruit Flow

## Create fruitfull collaboration

Collaboration is omnipresent in everyday work. How good are you at working together? Is your collaboration designed to get the best out of you and your organisation, or do you experience unconstructive arguments and tensions?

### Team development for better collaboration!

**Fruit Flow** supports you on the development journey of your collaboration. In a compact workshop format - enriched by gamification elements - away from everyday life.

### Fruit Flow offers you

Experience collaboration in different game situations

Insights into the effectiveness of your collaboration

Impulses (from us) for your cooperation

Making agreements about your future collaboration

### What insights will you harvest for yourself as a team?

#### Fruit Flow needs from you

- Time commitment of approx. 4 hours
- Team size of 6+
- Willingness to use gamification to (finally) tackle collaboration issues together
- Motivation to develop one's own behaviour and that of the team

#### Fruit Flow we for us

We accompany you intensively on this development journey, which is tailored to your needs. This means that the workshop addresses your core topic: innovation and team, hybrid collaboration, dealing with stress in the team, dealing with team phases.

We contribute our treasure trove of experience in collaboration as a keynote speech and throughout the workshop. The alignment of the gamification element, the game, is in good hands with us, methodically and personally.

We are happy to explain more about it (than fits on this page): [hello@changefication.com](mailto:hello@changefication.com)
